Treatment with CURODONT™ REPAIR FLUORIDE PLUS

- Early decay remineralization
- Works on all surfaces
- Acts below the tooth surface
- For permanent and primary teeth
- 1x fast & easy application
- For all patients, incl. children

After the CURODONT™ REPAIR FLUORIDE PLUS treatment

- Avoid rinsing, eating or drinking for 30 minutes
- Keep treated surface clean
- Apply CURODONT™ PROTECT once a day, after brushing at bedtime, for 1 week or until the tube is finished
- Perform daily thorough oral care
